

## SINGLE PHASE DEHUMIDIFYING DRYER – DR202

Twin dessicant beds assuring a constant drying process, with an average dew point:  $-45^{\circ}\text{C}$ . Compact design with high performance and low energy consumption.

### STANDARD FEATURES

- Insulated stainless steel heating chamber
- Double insulated stainless steel dessicant beds
- Motor & heater safety contactors
- Over-temperature safety thermostat
- Process air pressure differential switch
- Return air filter cartridge
- Electronic process temperature controller

### TECHNICAL CHARACTERISTICS

- Air flow:  $40\text{m}^3/\text{h}$
- Static pressure: 250 mbar
- Blower power: 0.2kw
- Heating power: 0.8kw
- Total power: 1.7kw
- Temperature:  $50\text{-}150^{\circ}\text{C}$
- Dew-point:  $-45^{\circ}\text{C}$
