

INLINE & PARALLEL BOX FILLER

Parallel and Inline Box Filling Systems - designed to provide exceptional efficiency and flexibility for your packaging needs. These cutting-edge systems combine the advantages and features of our renowned rotary tables, while also offering an exciting new feature: the option of a built-in box shaker.

OPTIONAL

The Custom designed Box Shaker maximises the number of products that can be packed into each box. The action is to lift individual boxes using custom designed pneumatic systems. The Box is shaken as it is being filled optimising the number of items being packed and improving the efficiency of the Box fill packing system.
